

<b>Variable Name</b>	<b>Example</b>	<b>Description</b>
Dimensions	10 20 20	Enter the 3 dimensions of the package. Each dimension should be separated by a space. The order is length, width, height. Please note that an item with dimensions automatically sets the Ship-alone variable to Yes, as there is no mathematical way to combine dimensions.
Free-shipping	Yes	If this is set to Yes, then there will not be a charge for shipping for this item if the "free-ship-method" is selected by the customer. This allows for example "ground" to be free, and for air to be charged.
Free-ship-method	2 42	In the Advanced Shipping Manager's backend, there is a list of the shipping methods. Enter the number of the shipping method that you want to use when an item has "free-shipping" set to Yes.
Ship-alone	Yes	If this item must be shipped alone (cannot have other items in the same package), then set this to Yes. Other items in the same order will be calculated in a separate package.
Flat-ship-rates	1=15.00 2=19.99 3=25.50	Each shipping method is defined on a separate line with a blank line between methods. The number before the equal sign is the method number, and after the equal sign is the shipping rate. Methods that are not defined will continue to charge by the rule that matches the destination.
Origin-zip	33498	Enter the origin zip code of this item. This zip code will be used to calculate the shipping cost of this item. If other items in the cart have a different zip code, then they will be calculated in a separate package.
Number-of-boxes	3	If a large item requires more than 1 package, specify here the number of packages that this item requires. If this is used, all boxes will be calculated using the ship alone rule. For example, there won't be other items in one of the multiple packages of this item.
Multi-box-weights	50 40 55	If this item has more than 1 box, then enter the weight of each box here separated by a space.
Multi-box-dimensions	20 20 50 25 30 50 25 30 50	If this item has more than 1 box, then enter the dimensions of each box here. Each box goes on a separate line with a blank line between each. Put a space between each dimension for each box.
Invalid-ship-methods	2 4 5	In some cases, certain shipping methods cannot be used with certain items. In this variable, enter the number of each shipping method that cannot be used with this item. Separate each method number with a space.
Markup	1.99	Markup or down shipping for a specific item. The value is a flat dollar amount.
Global-free-ship-exclusion	Yes	Exclude this item from getting a site-wide free shipping promotion. Regardless of other items, this item will ALWAYS be charged for shipping – even when the threshold for free shipping has been reached.
Exclude-states	AK HI NY	Exclude this item from being shipped to certain states. Separate each state abbreviation with a space.
Exclude-countries	AR TR SA	Exclude this item from being shipped to certain countries. Separate each country abbreviation with a space.
